# Executive Summary

## Score Breakdown

Category	Result	Impact
Google Negative Results	3 found	-15 pts
Court Record Sites	1/4 sites	-8 pts
Mugshot Sites	1/5 sites	-10 pts
Data Brokers	8/10 sites	-24 pts
ChatGPT Verdict	Flagged	-8 pts
Gemini Verdict	Flagged	-8 pts

## Top Findings

- 1** **Mugshot listings found** on 1 site(s): bustednewspaper.com. These are highly damaging to reputation and often appear in Google searches.
- 2** **Court records found** on 1 court record site(s). These records are publicly searchable and may be referenced by AI assistants.
- 3** **3 negative Google results** found across search queries. Negative results on Google page 1 are the most visible issue.

## Priority Actions

- 1** Remove mugshot listings immediately — these cause the most reputational damage and often appear in Google search results.
- 2** Opt out of 8 data broker sites to remove your personal information from public search results.
- 3** Request removal from court record aggregation sites, especially if records are expunged or dismissed.

## What an Employer Sees

When someone Googles "**John Sample**", the first page shows **0 positive**, **0 neutral**, and **2 negative** results. Negative content appears at **position 3** — likely the first thing an employer, landlord, or date notices. AI assistants like ChatGPT and Gemini mention concerning information when asked about you — an increasingly common way people research others.

# Action Plan

Based on your scan results, here are the actions that will have the most impact on your reputation:

## Priority 1: Mugshot & Arrest Record Removal

Your name appears on 1 mugshot site(s). These sites are designed to rank highly in Google and are often the first thing employers, landlords, and dates find. Most states now have laws requiring free removal within 30 days of a written request — your full report includes the exact sites, template removal letters, and state-specific legal citations.

## Priority 2: Data Broker Opt-Outs

Your personal information is listed on 8 data broker sites that sell your address, phone number, relatives, and estimated income to anyone willing to pay. Each site has a different opt-out process — some take 5 minutes, others require mailing a notarized form. Your full report includes direct opt-out links for every site where you were found, plus instructions for each.

## Priority 3: Court Record Removal Requests

Your name appears on 1 court record aggregator(s) that scrape public filings and make them searchable by name. Even dismissed cases and minor infractions show up. If your charges were dropped, dismissed, or expunged, you may have legal grounds to demand removal — your full report includes template letters and the specific contact information for each site.

## Priority 4: Content Suppression Strategy

There are 3 negative result(s) on the first page of Google for your name. Since Google's first page gets 95% of all clicks, pushing these results to page 2 dramatically reduces who sees them. Your full report includes a step-by-step plan to create positive content on high-ranking domains that will outrank the negatives.

## Priority 5: AI Reputation Management

ChatGPT and Gemini currently surface(s) concerning information when someone asks about you. AI chatbots are becoming the new background check — over 200 million people use ChatGPT monthly, and Gemini is built into Google Search. Your full report explains how AI models form opinions about people and concrete steps to influence what they say about you going forward.

## Priority 6: Ongoing Monitoring

Reputation damage can resurface — data brokers re-add profiles, new court records get indexed, and AI models update their training data. Set up free Google Alerts for your name and schedule quarterly re-scans to catch new issues before an employer or landlord finds them first.

**UPGRADE:** Get the complete action plan with step-by-step removal instructions, template letters, and direct opt-out links. Full Report: \$29 | Full + Removal Guide: \$99

# Methodology

## Google Search Analysis

We ran 10 targeted Google searches using your name combined with your city, state, and keywords like 'arrest', 'criminal record', 'mugshot', and 'background check'. Each result was categorized as positive, neutral, negative, record site, mugshot site, data broker, or news.

## AI Platform Analysis

We queried ChatGPT and Google Gemini with 5 questions each about you, including questions about trustworthiness and background. Each response was analyzed for mentions of criminal records, arrests, charges, or legal issues.

## Record Site Scan

We checked court record sites (JudyRecords, UniCourt, CourtListener, PACER), mugshot sites (Mugshots.com, BustedNewspaper, Arrests.org, JailBase, RapSheets), and data broker sites (Spokeo, BeenVerified, WhitePages, Radaris, TruePeopleSearch, FastPeopleSearch, Intelius, PeopleFinder, USSearch, InstantCheckmate). Court record and mugshot site checks use Google's index. Some sites use JavaScript rendering that may not be fully indexed by Google. For the most thorough record check, the Full Report (\$29) includes direct site verification.

## Scoring

Your reputation score starts at 100 and is reduced based on findings: -5 per negative Google result, -8 per court record listing, -10 per mugshot listing, -3 per data broker listing, -10 per AI platform mentioning criminal records, -8 per AI platform mentioning arrests/charges.

## Grades

A+ (95-100): Spotless. A (90-94): Clean. A- (85-89): Mostly Clean. B+ (80-84): Low Risk. B (75-79): Minor Risk. B- (70-74): Some Exposure. C+ (65-69): Moderate Exposure. C (55-64): Moderate Risk. C- (50-54): Elevated Risk. D+ (40-49): High Risk. D (30-39): Significant Risk. D- (25-29): Severe Risk. F (0-24): Critical — records dominate search results.

*Data collected on 2026-03-13. Results reflect publicly available information at the time of the audit.*
